CONTROL YOUR RESTAURANT

Managing and controlling a restaurant business is not an easy task these days. A lot of factors to consider between competition, suppliers, employees, customers, menu, delivery companies and more...

If you need really to control your restaurant, increase your sales, and reduce your costs then you need to use Jasmine RMS.

Jasmine RMS gives you all the tools you need to run your hospitality business, whether you have a café, dine-in restaurant, takeaway kiosk or just running a virtual kitchen Jasmine RMS covers all your needs.

Jasmine RMS modules helps you run the kitchen with kitchen printers or kitchen data screens KDS. It helps you to run your floor with waiter pads and easy to punch pos terminals. It gives you the means to control your cost by managing recipes, suppliers, and inventory.

Jasmine RMS will send you notifications when an employee voids an item after sending to kitchen, when an order was re-opened or when a receipt was re-printed.

Jasmine manager mobile app gives you the ability to monitor the performance of all your outlets from the convenience of your mobile phone.

Jasmine accounting module is the core of Jasmine RMS, it holds the assets, liabilities, revenue, and expenses. Its chart of accounts is built especially for the hospitality industry. It's designed for owners to understand and control their restaurant.
